Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Babitchenko (5078348).

Babitchenko discloses an universal fixture having a plurality of dual axis clamps (20) with slotted holes each rotatably and slidably secured rods (fig.1), and base (12). Babitchenko discloses enough parts to anticipate all claim pluralities. A plurality of threaded machine screws (30,68,88).

2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor (5298602).

Taylor discloses an universal fixture having a plurality of dual axis clamps with slotted holes (fig.1) each rotatably and slidably secured rods (20&36), and base (30). Taylor discloses enough parts to anticipate all claim pluralities. A plurality of threaded machine screws (40&52).

3. Claims 1, 5-11, and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ramsey et al (4946122).

Ramsey et al disclose an universal fixture having a plurality of dual axis clamps (38) with slotted holes each rotatably and slidably secured rods (10&12). Ramsey et al disclose enough parts to anticipate all claim pluralities. A plurality of threaded machine screws (54-58).

Response to Arguments

1. **Applicant's arguments filed 8/29/06 have been fully considered but they are not persuasive.**

2. **Applicant's argues that the prior art does not read on the claims.**

a. Applicant is reciting a lot of functional limitations that do not even connect any structure in such a way to to define the invention. The claims merely requires something that is capable but de void of any real configuration. All that is really need is orthogonal holes with some slots that have elements which are lockable. What really makes up the lock as well as clamp configuration. This is why the prior art reads because of the broadness and functional recitiations.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
